

LEFTY SOLUTIONS DONE RIGHT

Quality, Economical, and Lefty

I am an energetic and creative freelancer with a large range of skills. I am not afraid to try new things and adapt quickly. I work well independently as well as in a group. In addition to my technical skills, I am very personable and have strong people skills.

PROGRAMMING

I am a professional programmer with over 10 years of experience. Although I am most comfortable in C/C++, PHP, or Python, I have used a large variety of programming, scripting, and markup languages. I am comfortable with an assortment of databases as well as operating systems.

GRAPHIC DESIGN

I have done both 2D and 3D artwork. Although most of my experience has been in designing websites, I am comfortable using CAD software and assisting with 2D/3D visualizations. In addition, I am proficient in desktop publishing.

TEACHING

I have taught two programming classes (one of which was online) and spent two years teaching English at the Peking University at China.
